## NEW YORK ONEIRIC

### City lights & Wavertree Ship

You are standing at the Seaport in Downtown Manhattan, the East River at your side. Before you, a colossal 19th-century steel ship — the Wavertree — rises in silence, majestic and still. And through its mast and prow, the iconic Empire State Building emerges. It feels as if the city itself is rising from the ship, as though New York's skyline is sailing through time, floating above the deck in a river of city lights.
