## NEW YORK ONEIRIC

### Landmark Building and The Fence

A simple bush, a modest fence — elements so understated they almost go unnoticed.

Behind them rises the imposing Alexander Hamilton Custom House. Built in the early 20th century, this architectural icon features Corinthian columns, inspired by classical Greek art, symbolizing New York's economic power as a global port.

Every image in my New York Oneiric series holds a real and imagined story — one that begins and ends in your own imagination.
