The Oculus & Two Rector Street

The Oculus & Two Rector Street is a silent dialogue between, old and new, stone and steel, Beaux-Arts and futurism. Two Rector Street, is a silent witness of New York's evolution since 1907. Once a shipping company's headquarters, now a residential building with stories in every stone. It is an early 20th-century Beaux-Arts building. This is New York Oneiric, where the city becomes a dream.
